“ As a ham radio teenager in the 50s, Lary (he spelled it that way when he was using Morse code) was my \*hero\* because he knew more about amateur (ham) radio than I did. He inspired me to learn more about electronics.

*That inspiration led me to a wonderful career starting at UC Berkeley and subsequently in “Silicon Valley.”*

*We lost contact decades ago, but I have never forgotten how he inspired me to succeed in radio and electronics.*
